

Hiquphon OWII High-end soft dome tweeter

to music with love...

Features:

- Soft dome tweeter (3/4") offering unique analytical capacity and high sensitivity.
- Featuring one of the finest dispersion characteristics possible.
- Ideally suited for speaker systems using equally high-quality midrange or mid/bass drivers with suitably matching sensitivity characteristics.
- Matched pairs selected to +/-0.5 dB within 2-20 kHz guaranteeing unique stereo imaging ability.
- Excellent choice for 3 way systems in general.
- Also a fine choice with 2 way systems, if mid/bass is broad-banded enough to fit into the shape and level of the tweeter frequency response.
- Extremely carefully made in Denmark by Oskar Wroending – an artist in speaker manufacturing.
- Version with gold coloured dome available (HTOWIIG)
- Sold in matched pairs only.

Special features:

- Excellent frequency linearity 5 - 20 kHz +/- 1 dB typical
- Extremely fast transient response
- Excellent phase linearity
- Low well controlled resonance frequency
- Well controlled damped low frequency response, soft raising
- Broad-banded (2.5 kHz to 25 kHz)
- Very low distortion
- A-periodic damped moving system
- Exponential horn-loaded phase-correction
- Saturated magnet gap for low magnetic distortion
- Perfect sealed housing
- Heavy duty connectors for 2.5 mm² lead wire
- Excellent, mechanical robust, non-vibrating, soldering contact
- Shock absorbing construction
- Matched pairs +/- 1/2 dB in frequency range 2-20 kHz (OW types only)
- Beautiful sound capabilities
